_____

Name=EVE Pilot 12.2.0
URL=https://www.macrolab-online.com/downloads/evepilotsetup.exe
Size=41563662
MD5=72491e43dd6f32e420d447eea74a8ddf

First run is required if you have tiny font but eve client loaded with small font size after first run.
You may also use shared settings->error corrections->Fix Font Size button
Please let me know if you still have problems with font size
Bot should select tiny font size (if present) otherwise small font size
To check font size start eve client with bot, pause bot (Control + P), open settings (ESCAPE) and switch to interface tab

Added possibility to detect and avoid corruption 5 systems during traveling
If system cannot be avoided (will probably never happen in high sec), bot will generate error and close
Bot will set proper username if you use steam account during first run

BugFixes:
Looter will close information popup message when waring to anomaly
If type column in locations window not visible, bot will properly scan bookmark names
FW bot will not run missions in stable systems for defence side
