New event is breaking bot
Posted by Gazlo - 2018/08/22 08:39

_____

Agency pop-up window... Bot continues OK if you close it manually.

_____

Do you mean the agency window with starmap? Miner opens it if you enable "avoid forward base" function in maneuvering. Send me screen of your agency window in bmp quality (alt + printscreen, save in image editor as bitmap) and log file. If bot fails to detect that this window is closed need to fix

_____

Its the new popup when you first login to EVE. Theres a bug where it can't be turned off permanently so it will popup on every time a character logins. It covers part of chat, people and places, and cargohold and this breaks miner bot and some others. Market bot only works because it brings market window to front above popup.

_____

I need a screen in bitmap quality of this popup window to remove it. It is not appearing for everybody.
