

Triglavians are gone

Posted by Slav2 - 2020/05/26 07:55

- there are no roaming fleets in systems, miners can mine again in weak ships :kiss:
- just a few systems invided by triglavians, heavily camped by players so no trigs live longer then a few seconds.
- EDENCOM faction appears white, will not attack you.

So atm I will not add triglavian checks at all. Will see how this invasion progress over time. Right now systems appear to be safe.
