

## license expired

Posted by unknownfornow1 - 2011/12/28 03:23

---

now i know that somewhere there is a thread with this question but to much to look through anyway my trial licence expired (i downloaded it when it wasnt working) i brought a miner licence but i cant open the program because it has expired people say to put a fake licence in so it will work until i put my new code in but i dont know how to do it. if you can exactly how to do this would be nice. thanks

Fake license is a license generated with any serial (for example 0000-0000-0000-0000-0000-0000). You will need to replace this license as soon as you finished first run with license with valid serial. Fake license will allow you to finish first run.

Otherwise paypal payment is instant and you should be able to generate license as soon as your order became "confirmed" or "shipped". Check your orders and dont wait. Manual to generate license is here.

it is still processing. i sent the money to paypal on 26. money left my bank to go to paypal on 28 and paypal says wont be done until 30 but that was yesterday so i guess ill just have to wait. i havent used paypal before. i used my credit card when i tested eve pilot over a year ago. any idea on when we can just use a mastercard and not have to use paypal at all?

If you connect your master card to paypal you should be able to use it instead of e-checks. E-check payments is like bank transaction and take several days to complete. If PayPal dont receive money in reasonable time it will cancel purchase automatically.
