

pos mining

Posted by cippy - 2013/06/05 23:20

I didn't check to see if you disabled this already or not, but with Odyssey, you only have to be within the pos shield to transfer ore, so the bot doesn't need to make sure it's within distance of the corp hangar/ship assembly----that just wastes a few seconds worth of mining time *wink*

Did not even test this yet.

It works in game *grins* I can fuel my tower from 10k away and transfer ore from anywhere. Super awesome change.

No.... It means I don't have to be within 2500 meters of a corp hangar or ship assembly array to more stuff from my ore hold into the POS module. It was one of the big changes to POSes for the Odyssey patch and talked about since Fanfest? Anyway it means you don't have to worry about getting stuck on the tower or something if you're trying to access something in the POS because you can access it from anywhere (as long as you're inside the POS shield).
