

## Drones are not starting

Posted by Loser-noob - 2020/02/04 10:19

---

Hello everyone,  
the (Hornet II) drones are not launched in EveMiner.  
The NPC are within range.  
There are enough drones in the hangar.  
Settings are like in the FAQ for combat drones.  
My skiff tanks it all, but I'm surprised that the drones don't start.  
Can this be related to the name of the drone? Only Hornet is in the settings, Hornet II are equipped.  
I'm a bit overwhelmed. [https://www.macrolab-online.com/kuploads/images/No\\_Drones.PNG](https://www.macrolab-online.com/kuploads/images/No_Drones.PNG)

Drones start for protection only. You have 100% of a shield and fight module is not activated yet. You can tick to start drones in advance. Bot will not monitor drone HP status although.
