

## error / message? EvePilot

Posted by Loser-noob - 2020/02/05 00:37

---

Hello everyone,

I get an error message as shown in the picture.

What does this message want to tell me and what do I have to do so that Evepilot no longer displays this error / message?

When you start bot just wait a few seconds before you open client's settings or switch client number.
