

Orca settings?

Posted by erussell - 2020/09/01 21:09

Could someone help me with the settings for 1-2 orcas. I'd also like some info on how to set a timer
Thank you!

And does anyone know how to set my orcas ORE bay to fill up completely before docking?

About timer here is a manual. Just dont forget that when timer is ON eve is OFF. Timer sets a time when you switch off eve.

If you use orca as miner (with mining drones) increase max time in belt value and set min/max cargo at 99%.
