

Deliverer suggestions

Posted by Mahona - 2021/01/13 21:38

I have 2 suggestions for the Deliverer bot.

A way to activate shield hardeners when initiating warp after a jump
and

A way to use the ore hangar instead of the default hangar to make transporting ore easier

EDIT: These issues are because the mining bot is working so well. I'm surely getting a lifetime after trying it today.
