

Triglavian Invasions

Posted by musi - 2020/07/04 23:47

Hey,

Recently purchased the bot, even though I have set it to avoid the invasions I've had 3+ repeated deaths where it's gone into an invasion and got instapopped.

Any ideas on how to stop this from happening?

Triglavian Invasions

Posted by Gor_v - 2020/07/10 05:27

Кстати у меня тоже не работает избегание триглавов.
Уже два блокадника слились.

=====

Re: Triglavian Invasions

Posted by phreak208 - 2020/07/10 10:17

Same issue on both my accounts, lost courier ship and pod to Trigs...

=====

Re: Triglavian Invasions

Posted by Slav2 - 2020/07/10 23:18

I will return triglavian checks in the next bot version. When new trigs system just appeared there was just one system with triglavians = not enough for tests. I see 90% of systems now are in "final liminality" tab, no need to jump from tab to tab to collect all system names.

=====

Re: Triglavian Invasions

Posted by Slav2 - 2020/07/11 10:51

Updated bot, check how it works

=====

Re: Triglavian Invasions

Posted by phreak208 - 2020/07/11 12:31

Thanks Slav, downloading now.

Will keep you posted on this.

Re: Triglavian Invasions

Posted by gamerHead - 2020/07/11 13:58

The bot just tried to go through a trig invasion with the new version. Thankfully it managed to warpout before dying

=====

Triglavian Invasions

Posted by Gor_v - 2020/07/11 14:20

Обновление не помогло - опять у триглавов блокадник слился.
Следил за ботом 2 часа. Не заметил как он делает проверку на триглавские системы.
Может надо first run повторить?

=====

Re: Triglavian Invasions

Posted by musi - 2020/07/11 23:07

Still died at trigs for me.

=====

Re: Triglavian Invasions

Posted by Slav2 - 2020/07/12 23:01

Need to check log file and system name where bot was killed. Send info to my mail please

=====

Re: Triglavian Invasions

Posted by Slav2 - 2020/07/13 08:05

The problem is that Piekura and Inaya are triglavian systems. It is visible in the route if you set these system as destination. But they still not shown in the list of triglavian systems in the agency (where bot takes the info). I dont see good way how to fix this

Can we them to avoid list or won't that matter to much?

Think I'm gonna try and level up Amarr standings and do courier missions on their ground

=====

Re: Triglavian Invasions

Posted by Slav2 - 2020/07/14 01:27

I can add avoid list as a temporary solution

=====

Your call, I can try it with the avoidance list.
Else I move to Amarr space

Point taken, please add them to avoidance list then.

I'll download and test

Also, you want to grind Caldari with Courier bot to use with Trader bot (a few of us anyway).

Avoidance is fine with me.

Re: Triglavian Invasions

Posted by Slav2 - 2020/07/14 04:45

Updated test version. You will see new expanded panel with textbox where you can enter system names to avoid. Let me know if it works

Re: Triglavian Invasions

Posted by phreak208 - 2020/07/14 05:19

Testing now, thanks for the fast update!

Ran 2 couriers for 6 hours, no deaths so far.

Avoidance is fine with me.

Is trader bot still worth it since the tweaks to relist fees however?

=====

"Is trader bot still worth it since the tweaks to relist fees however?"

Well let me just say this. All RMT players are using a Trader bot. It might be this one, not sure about any others.

So yes, i'd say its worth it.

@slav2 may have to come in and elaborate if it's worth it or not though.

That's weird, running for 2 days on both accounts with no issues so far.

I assume you are running Caldari Corporations also?

Re: Triglavian Invasions

Posted by phreak208 - 2020/07/16 09:46

Nvm Pilot just jumped in Piekura (took some shield damage)

Do they ever tackle, else I just fit a tank on the ship.

=====

Re: Triglavian Invasions

Posted by gamerHead - 2020/07/16 12:02

They do tackle with web and scrambler.

I just lost a courier going through Piekura even with the new avoid system list. I had Piekura on the avoid list.

I watched the series of events that caused it to go through Piekura. It set destination for a system far away from its current operating area that was near Piekura. I have no idea why it does this but it consistently does it for me every hour or so even though there are systems within 1-2 jumps of it with available agents. After arriving at the new system close to Piekura it declined 2 low sec missions and then set destination to a system on the other side of Piekura. It then died trying to go through the gate camp in Piekura.

Re: Triglavian Invasions

Posted by Will_E_Coyote - 2020/07/18 08:25

Since three days - Killed and podded the whole day with two accounts. Did not change configuration.

"Avoid Triglavian Systems" is activated, but seems to have no effect. Any suggestions?

=====

Re: Triglavian Invasions

Posted by Slav2 - 2020/07/18 22:29

Need to check what mission bot tried to do. Before triglavian change these fleets were not so dangerous and courier could still path to triglavian system to complete storyline and expiring missions. If this is the case I will make strict rule to stop going here for any of missions even if they are expired soon.

Try to add system to avoid list in in-game autopilot. Need to do this during first run to save in settings

=====

Re: Triglavian Invasions

Posted by Slav2 - 2020/07/18 23:02

Better to add dangerous systems to avoid list in autopilot because this way bot will waste time (+5 jumps), but not possibility to path between areas. In first run wizard settings tick pause bot after first run

https://www.macrolab-online.com/kuploads/images/pause_bot_fr.jpg

After first run bot will dock and show message. Click OK and add system to avoid list, check avoid systems in avoid list

https://www.macrolab-online.com/kuploads/images/avoid_piekura.jpg

Click Control + P to unpause bot and finish first run

Re: Triglavian Invasions

Posted by Will_E_Coyote - 2020/07/19 03:57

I am killed in Kulelen as well. So I have to put Inaya, Piekura and Kulelen at the avoid list?

=====

Re: Triglavian Invasions

Posted by Slav2 - 2020/07/19 08:25

Yes, add those systems to avoid list.

I have found better way how to detect dangerous systems. 200 most resent kills have all system names

we need.

=====

Re: Triglavian Invasions

Posted by Slav2 - 2020/07/19 11:51

Obe,Senda,Akora,Inaya,Vaajaita,Aldik,Hikkoken,Carrou,Piekura,Arraron,Athounon,Taisy,Nonni,Ordat,P
akkonen,Netsalakka,Oshaima,Ichoriya,Actee,Harva,Kulelen,Gammel

This is actual list of dangerous systems based on past 3 day kill reports. You can use it while I update
bot.

=====

Re: Triglavian Invasions

Posted by Will_E_Coyote - 2020/07/24 00:50

I was killed in Inaya despite it was on the activated avoid list.. Loose 1 upto 2 ships a day. The
workaround does not work very well...

=====

Re: Triglavian Invasions

Posted by Slav2 - 2020/07/25 22:30

Guys if you was killed in any of systems send me log file from this run. I will check if current mission was
storyline mission, expired mission or bot generated route outside of dangerous system but in-game
autopilot plotted route via dangerous system instead. If both routes takes the same number of jumps this
outcome is possible

=====

Re: Triglavian Invasions

Posted by olean - 2020/08/21 05:07

What worked for me for now is disabling storyline missions and avoided manually the systems in the
route planner in-game. Maybe even with storyline missions it will work properly too, will test later.

=====

Re: Triglavian Invasions

Posted by Slav2 - 2020/08/24 20:31

Best way if you add systems with triglavians to avoidance list in autopilot during first run. List of systems to avoid is shown in the log. How to record log is in the list in my signature.

The problem exist because in-game autopilot and bot's autopilot sometimes plot different routes. Bot uses shorter routes based on number of jumps only. Random route is selected if several routes has the same number of jumps. In-game autopilot uses something else, probably distances between gates.

Re: Triglavian Invasions

Posted by djdoom32 - 2020/08/26 12:55

i lost my courier in Niarja. that system was on my avoid list!!! :angry:

I try the BETA Version now...

Beta looks better. No deads...

=====
