

Bring reward to home station

Posted by evaexe - 2019/05/18 23:02

Hello,

sugestion,

its will be possible to bring mission reward to home station ?

After finish soryline mission, agent reward you with implants, but the bot lmeft the implant in the station and continue to earn money, after that, to redeem implant we must go back to the station with a shuttle, and bring back the implat to home station,

so, willl be very good if the bot can take the reward in the ship (1 m3) and drop the implant in home station when he go back for example to take ore for trade storyline mission,

Thanks,

=====

I made new function in latest version. Enable level corp standing option and relocate your home station to a station with storyline agent. Most of storyline missions will go to this agent. All implants will be in one place, no ore transporting required. Create bug report of something not working and untick "memory optimization" if ticked (bugged in new version).
