

Ip collection

Posted by bartender_dk - 2020/06/06 12:25

Hi there...

Is it possibel to change the trade station from jita trade hub, to another trade hub. Since i am 39 jumps away from jita. And it take to long time to go there. And there is to many gate camps / gankers on the way. i have already lost 2 ship and lp collection on the way to jita..

This post should technically go into trader support.

If your struggling to get to jita use a cheap shuttle to get there faster. Or a covertops frigate can not be stopped by a gate camp if u fly cloaked and cloak up as soon as u hit warp.

i would love to do that. But the lp col. do it by the program / bot. And u have no control over it. It use the ship u use for couriour missions. normally it is a tayra freighter. because at max level u transport around 16,000 m3 around. from station to station....

And since there are other major trade hubs than jita. Why not use them instead. Other trade hubs = Less ship loss... ;)

If I activate other hubs multiple bots drag items here and nobody will ever sell anything because trade volumes are low (2 implants/week)

I would fit ship with large shield extenders and transported staff for max 30 mils at a time to avoid ganks.
