

issues with salvaging

Posted by asda1702 - 2018/02/07 14:05

Hello!

I have come across with an issue during salvaging.
It does not finish salvaging the whole wrecks.
It's salvages half of the wrecks, then deletes the bookmarks and goes to the next.
It's supposed to delete the bookmarks once all the wrecks are salvaged.
In the log i does not see any problem, anyone seen anything like this?

Thanks!

Best if you send me log file as described in the link in my signature. I should see details of a bot work.
