

Looter stuck on Corp bookmark

Posted by gnagnagna - 2020/09/11 16:47

Hi guys.

Looter sees the corp bookmark, undock, warp to bookmark (in 00 anomaly), and then instead of tractor/salvaging he put the "Gates" preset, right click on bookmark and stop ship, in a loop.

I've tried to use also the beta client, no success

Any solution is appreciated, thanks

Да, у меня тоже. Прилетает на буку, жмёт на неё и ничего не делает. Останавливает корабль и повторяет.

I am having the same issue. Looter gets to the BM, right clicks it, then loops. I looked at he log and it seems like it can't see the approach button. I tried increasing my font, but no luck. Not sure why the looter has an issue but all the other bots can use the bookmarks just fine.

Я залил новую тестовую версию, да так и не обновил для всех. Надо торгаша потестить. Сделал кое какие изменения и побаиваюсь обновить без тестов, а руки что то не доходят :blush:

Use test version. I will update bot after another tests in trader.

Спасибо!
Вроде работает.

Looks like working.
