

## first run issue

Posted by usulix - 2021/10/13 22:07

---

hey,

i have an issue with first run  
to the settings short cut : directional scanner "unknow key"  
quit eve client and loop again

can yu help me to fix that ?

Hmm, you probably need to change directional scanner hotkey to something else in settings or switch to standard keyboard.
