

## Why does bot leave site?

Posted by rrfarmer - 2014/02/25 14:55

---

why does the bot do a few waves of an anomaly and then warp back to the 00- bookmark?

the shields are ok, the capacitor is ok and local is clear.

What is about max single fight and max operation fight times? Try to increase them. If this will not help, record log file and send it to me.

Need client's log of cause. This General log is used to monitor some random events like EWO. Looks like bot finished fight normally. Send log to my e-mail with a subject "log files" as per my signature.

I unchecked the box that makes the bot re-look for anomys every 10 minutes and it runs fine now.
