

Abyssal Bot

Posted by X4vbtz - 2020/12/17 01:54

o77 amigos, how do i set the bot to just orbit the main cache and wait until job is done rather than having it chasing frigates lol
tyy

Re: Abyssal Bot

Posted by Slav2 - 2020/12/17 02:11

Increase attack distance. I would recommend Gila with drones, AB and drone link augmentor

=====

Re: Abyssal Bot

Posted by X4vbtz - 2020/12/17 02:20

I'm using an AB active shield tank Ishtar with 1 link augmentor and only drones as dps source, the only thing I'm afraid of is while dancing with frigs I might end up out of the abyssal and take big boi damage from the aoe thing

=====

Re: Abyssal Bot

Posted by Slav2 - 2020/12/17 02:49

Bot is reading damage sources from log and start moving ship to cache in case of AOE. Works good with AB, with MWD you may get out too far to return

=====

Re: Abyssal Bot

Posted by Slav2 - 2020/12/17 02:51

What is your drone control range. Normally bot should not move for frigs. It may move to AOE stucture to kill frigs if you activated this option

=====

Re: Abyssal Bot

Posted by X4vbtz - 2020/12/17 04:11

Slav new big issue, on my ishtar picking Full - you use drones as damage dealers all the time the bot won't launch the drones and if i launch them manually it won't interact with them. I dont have any turrets fitted

=====

Re: Abyssal Bot

Posted by Slav2 - 2020/12/17 04:39

Wait for update, I have found that bot need to focus to drone window before sending drones with shift + f default hotkey.
Also check that drones are in aggro state after first run or bot will have hard times to kill all frigates in T3 mission.

=====

Re: Abyssal Bot

Posted by X4vbtz - 2020/12/18 00:46

As after the update bot still won't launch drones, do i need to fit a turret on ishtar to trigger combat or something?
(I did the first run again clearly)

=====

Could you please change your avatar, as I start to confuse where is my posts and where is yours.
Send me log file as per link in my signature. I will check if bot tried to launch drones or not. Also screen your settings. Did you set drones to full mode?

=====

Re: Abyssal Bot

Posted by X4vbtz - 2020/12/18 05:47

just tried again, yes with drones in full mode, bot won't launch them; it gets into the abyss, starts

modules, orbits cache first then npc and just keeps orbiting them

=====

Re: Abyssal Bot

Re: Abyssal Bot

Posted by Slav2 - 2020/12/18 13:36

You did not register any fit yet.

When your ship is ready to run abyss site (modules and rigs fitted, drones loaded to bay, ammo/paste loaded to cargo hold, filaments unloaded) open fitting. Copy fit to clipboard

https://www.macrolab-online.com/kuploads/images/fit_to_clipboard.jpg

Open new ship fitting plan and paste fit to bot

https://www.macrolab-online.com/kuploads/images/load_fit_to_bot.jpg

Finally define module positions in modules settings. If you dont want to purchase a copy of your fit, strip fitting and repackage, so bot will know that nothing is missing

=====

Re: Abyssal Bot

Posted by turringtest - 2020/12/19 17:03

@Slav

is the fit you have in the knowledge base still ok for lvl 3's?

I assume you can't fleet with two chars with the bot ?

=====

Re: Abyssal Bot

Posted by erussell - 2020/12/19 23:04

So I am having issues with the Abyssal first run goes fine I have setup two systems one "Trade hub" where I have ammo/ ship refits ready and another repair/refit system where I do my missions. After first

run I start the bot and it travels to my trade hub and tried to purchase a new ship even though I am currently inside of the Abyssal Gila. then it gets stuck in a loop selecting all items then closing items, opening ships and closing after it searches for Gila and it continues this until I stop the bot. I followed the directions on the manual but I can't figure out what is going on

=====

Re: Abyssal Bot

Posted by Slav2 - 2020/12/20 05:36

Could you please send me log file as per link in my signature. I will check details.
If you use virtual machine check manual

Most users has problem with fitting table now. Did you use clipboard to transfer your fit from game to fitting table?

=====

Re: Abyssal Bot

Posted by erussell - 2020/12/20 08:49

yes I used the clipboard I will get a log ready for you right away

=====

Re: Abyssal Bot

Posted by erussell - 2020/12/20 09:28

Log file sent If this helps anyone I was able to fix the issue with the loop in station by repackaging the modules. But my new problem is that after the bot fits the mods it warps to my mission system then to the Mission Bookmark. and instead of using the filament it sets the destination back to the fitting station and unloads/reloads cargo

=====

Re: Abyssal Bot

Posted by turringtest - 2020/12/20 12:05

Yeah mines doing the exact same thing. Warping to bookmark then docking on a loop

It worked fine until I lost a ship then changed the fit

=====

Re: Abyssal Bot

Posted by Slav2 - 2020/12/20 12:13

Send logs guys as per link in my signature. I will add tooltip to show what is going on or will fix a bug.

Re: Abyssal Bot

Posted by 4ndi - 2020/12/31 05:41

Hi

i had a tiny Problem :)

My Abyssal Bot do not enter the Site but switches to NPC's in the Overview and waiting on the Safe Spot :(

I already sended a Email with the logs.

I tried to get it work the Abyssal Bot works with the Mining Folder i already created for EVE Miner.

If i Started the bot he do everything fine on start. Buy the Ship and Fit them. Purchase Ammo and the Filaments.

Jump to the System where i placed in. And there he Warp to the Safe Spot (Second green Entry in the Bookmark list)

For me it is an Belt in this System and then he do Nothing :(

I think there is a little failure i do but i cant figure it out.

Why i wanted to do that with the Mining Folder i had ?

I think there is no other way to fast switching what i wanted to do and not getting detected. I often switch between Courier / Mining to get no detecting. But if i always had to switch all my Bookmarks this is horrible for me or there any other ways ?

What i have to say too is: All Bots i Purchased sience now are great in a way like no other before. It is really awesome !!! Great Work !!!

=====

Re: Abyssal Bot

Posted by 4ndi - 2021/01/03 05:22

Hi again,
finally i got it. I dont really know what the problem was. I think it was something with the Bookmarks.
But no it Works and it Works GREAT !!!
I had an Gila passive Tank / Ship and Fit are about 230 Mil. and i run every Type of Tier 2 Filaments with it.

Just Great !!!

=====

Re: Abyssal Bot

Posted by anonymous0089 - 2021/01/03 06:30

How did you name your bookmarks?

=====

Re: Abyssal Bot

Posted by 4ndi - 2021/01/03 08:06

- 01_Tradehub
- 02_Station
- 03_Safespot

The first is in Jita
02 is an Station 2 Jumps away (Rep Station / Drop drones and ammo here)
03 is between 02 and an Asteroid Belt

02 and 03 turns green if you are in the system where you start the filament

Re: Abyssal Bot

Posted by anonymous0089 - 2021/01/03 12:45

Ah ok bots working now, thanks
I just have an issue now were it is not turning on my active hardeners,
I just have to define which slot is an active module right? (abyssal)

=====

Re: Abyssal Bot

Posted by 4ndi - 2021/01/04 01:18

i think there is only the option "repairer" useable.

But !

i think the best way for these are an completly passive ship because on Tier 2 the NPC´s are sucking Energie from your ship and the hardeners then useless.

=====

Re: Abyssal Bot

Posted by turringtest - 2021/01/04 01:28

Boosters are "repairers"

Hardeners are "Active"

You can easily run a cheap active tank in T2 with good skills and Implants

=====

Re: Abyssal Bot

Posted by 4ndi - 2021/01/04 12:22

Can you plz post an example?

=====

Re: Abyssal Bot

Posted by anonymous0089 - 2021/01/04 13:11

My issue has been fixed geforce experience also had alt + keybinds

=====

Re: Abyssal Bot

Posted by turringtest - 2021/01/07 06:40

Slav I sent the log files last night.

The bot gets to safe spot than just returns to the station

Its sorted fucking noob mistake lol

Cargo price was set below the price of the new filaments + ammo ...dohhhh!

Re: Abyssal Bot

Posted by erussell - 2021/01/20 09:39

So I have a new issue Slav during the rooms with the Marshals I have experienced crashes I logged

the last one. The bot was working fine and after around 1 hour 20ish min it closed the client during the same room as the other crashes.... lost a pretty valuable pod/Gila the first time played it safe with the second and BOOM the client closed again. Could this be traced to me changing fits ect? I always do a First run if I change ANYTHING even if it's ammo count, mod or pod. Emailing you logs again I tried to send them to you a few days ago

*Logs sent

Will copy this from your mail.

If we are talking about the moment from the log, I see that NPC drained your capacitor till 0 then quite fast shield from 55-60 till 0:

- 12:10:26 (9119) Check HP. Shield: 75, Armor: 100, Capacitor: 34
- 12:10:31 (9124) Check HP. Shield: 70, Armor: 100, Capacitor: 12
- 12:10:31 (9124) Check HP. Shield: 70, Armor: 100, Capacitor: 0
- 12:10:32 (9125) Check HP. Shield: 68, Armor: 100, Capacitor: 0
- 12:10:34 (9127) Check HP. Shield: 70, Armor: 100, Capacitor: 0
- 12:10:35 (9128) Check HP. Shield: 68, Armor: 100, Capacitor: 0
- 12:10:37 (9130) Check HP. Shield: 62, Armor: 100, Capacitor: 0
- 12:10:41 (9134) Check HP. Shield: 58, Armor: 100, Capacitor: 0
- 12:10:47 (9140) Check HP. Shield: 48, Armor: 100, Capacitor: 0
- 12:10:51 (9144) Check HP. Shield: 39, Armor: 100, Capacitor: 0
- 12:10:56 (9149) Check HP. Shield: 24, Armor: 100, Capacitor: 0
- 12:10:59 (9152) Check HP. Shield: 14, Armor: 100, Capacitor: 0
- 12:11:03 (9156) Check HP. Shield: 4, Armor: 100, Capacitor: 0
- 12:11:08 (9161) Check HP. Shield: 0, Armor: 50, Capacitor: 0
- 12:11:11 (9164) Check HP. Shield: 0, Armor: 0, Capacitor: 6

=====
