

AbyssHunter Not repairing drones in station

Posted by anonymous0089 - 2021/08/05 12:51

Is Anyone else having issues where AbyssHunter is not repairing drones and going a loop between the selected system and Jita in a loop?

Send me log file as per link in my signature. Also make screen from your station and save as screen.bmp, send to me.

Bot detects repair shop image in station services to open repair shop. If image not detected, bot will not repair drones.
