

## H-Bot Abyss

Posted by Dread80RN - 2022/04/30 10:34

---

Hi everyone,  
i would like to buy the full version of H-Bot to do Abyss T3 or T4,  
how does the bot behave with these abyssals?

Regards

T3 is OK. You can load default settings for Gila, create couple of bookmarks in Jita and after first run bot is ready to run missions. About T4 I have already noticed on forums, that if several bots start to do T4, corresponding filaments from market will gone and everybody will have to roll back to T3.

Can the hunt bot be set to use T4 filaments it gets from drops but not buy T4 from market?

Define max filament price in settings and bot will not buy expensive filaments. Good to make t3 and t4 and still purchase some t3 when no filaments left
