

Adding to overview settings

Posted by spin36 - 2022/08/03 14:36

I'm trying to set up hunter abyssal bot in null sec I have created my too safety spots (one at the keep star and in were I'm going to do the abyssal). The issue I seem to be having is the imported overview settings don't see the keep star as a place to dock. only NPCs stations seem to be selected . I have tried pausing the first run and adding the citadel to the overview settings ,but client just sits there then times out .

Any thing I'm doing wrong like missed a tick box or setting in client.

Abyss hunter does not work like with citadels. I can update bot to accept refit station in the form of like trader
