

Faction Warfare Bot wont start

Posted by Darkmercenary - 2021/05/29 10:00

Good morning,

Recently I purchased the faction warfare bot, did the first run, followed the extra tips to pause the bot and edited the route settings, went into low sec and disabled the dialog box, and unpaused completing the first run successfully. I downloaded the key put it in the bot folder and now the bot won't start. I will select the bot hit continue and it simply does nothing. Please help me resolve this issue.

Thanks

-Dark
