

After update Auto Trader broken

Posted by anonymous0089 - 2019/05/13 01:44

The Auto Trader according to the log is just stuck trying to open people and places after recent update
Any solution?

```

Record log file till bot restart eve after timeout. Looks like that you need new first run. If you had alfa clone then paid for omega, default theme is changing from Dark Matter theme to colored faction theme.
