

AT not Distrubuting isk properly

Posted by spidermonkey659 - 2020/05/21 02:59

Autotrader is not using my isk properly.

305 orders

max fund per buy order: 9b

sell itens and ships

wealthy trader enabled.

total buy orders never exceeds:44b

isk left in wallet:90b+

How come?

=====

Autotrader is not a bot which will distribute 100 bils isks. I did not optimize it for so much ISKs. Switch to remote trader first. Bot will install buy orders in perimeter and with 1% BF bot will find more items to buy and resell with profit. And activate collector (use beta) or collect items manually.

How much buy/sell orders and free slots you have now?
