

## Autotrader not makeing new buy orders

Послан MiBaf - 19.04.2022 01:26

---

For some reason Autotrader doesnt make new buy orders, I have created a history file. Bulk seller is on max amounts of orders still leaves extra free orders open for use.

Skins and boosters ticker is ticked

Max resolution is ticked

Max funds pr buy order is not ticked

Sell items and ships are both ticked

Free isk is set to 0

Remote buy orders are set active but never undocks.

What am I doing wrong ?

From help:

8)  
Tick 'Bulk Seller' if you dont want to buy new items, but sell your existing staff only. Bulk seller still continue to update existing buy orders. Again, if bulk seller is ON, bot will not create new buy orders. Bot will only install buy orders if you have enough items with total price > 10 millions. If you want to sell every item, enable bulk seller mode. Bulk seller mode has no total order price check.
